STEP 1 — Scan QR code below

Get started by scanning code or visiting
www.versahub.com/setup/versatile/
to begin device setup.

Visit **versahub.com** for setup video
instructions, troubleshooting, and guides.

STEP 2 — Follow device setup on VersaHub™

IMPORTANT
During setup, place your VersaTile in its intended location.
While connecting device to your WiFi it will indicate signal
strength. Ensure a strong WiFi connection is available with 4
bars (recommended) or greater.

SSID	Signal	Enc.
TP-LInk_27a	▄▄▄	WPA/WPA2/PSK

STEP 3 — Setup Notifications & Alerts

After completing setup, configure alert thresholds in
device settings panel.

INSTALLATION TIPS

Install VersaTile as high as possible to avoid being
surrounded by containers of food/water/etc., which can
impede WiFi connection.

VersaTile is provided with a sticky mounting tab. Prior to
installing, ensure surface is clean and free of any moisture.

VersaTile has excellent battery life, but can be plugged into
a USB-C charger for fast sync and recording intervals.

Questions? **www.versahub.com/setup/versatile/**
